ROOFTOP GREASE CONTAINMENT SYSTEMS

POLY WASH PADS

Wash pads play a vital role as a first stage wash filter used during regular scheduled hood cleanings. For just a few dollars per cleaning, you can easily eliminate the messes that occur when washing the exhaust fan. Our theory is “if you don’t make a mess, you won’t have to clean it up”. These pads will not only save your company time and money but will also help ensure the environment will stay free from unnecessary wash grease.
